

DEPLOYMENT SUCCESSFUL!

Your Application is Now LIVE!

Your Production URLs

Main Production URL:

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app
```

Admin Panel:

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin
```

Customer Signup (Example):

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/signup?tableId=YOUR_TABLE_ID
```

What's Been Deployed

Environment:

- Vercel Production
- All Firebase credentials configured
- Build successful
- HTTPS enabled
- Global CDN active

Features Live:

- Admin Panel
 - Kitchen Management
 - Live Bills
 - Past Bills
 - Menu Management
 - QR Code Generation
 - Table Layout
 - Customer Ordering
 - Real-time Updates
-

How to Access from ANY Device

For Admin Panel:

From Your Current Mac:

1. Open browser

2. Go to: `https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin`
3. Login with admin credentials
4. Done! ✅

From Another Computer (Windows, Mac, Linux):

1. Open ANY web browser (Chrome, Firefox, Safari, Edge)
2. Type the URL: `https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin`
3. Login with your admin email and password
4. You're in! ✅

From Tablet (iPad, Android):

1. Open Safari (iPad) or Chrome (Android)
2. Go to: `https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin`
3. Login
4. **Optional:** Add to Home Screen for app-like experience
 - iPad: Tap Share → Add to Home Screen
 - Android: Menu → Add to Home screen

From Phone (iPhone, Android):

1. Open browser
2. Go to admin URL
3. Login
4. Works, but desktop/tablet recommended for admin work

Key Point: Same URL works on ALL devices! 🌐

How Customers Access Menu (QR Code Flow)

Step 1: Generate QR Codes

1. Login to admin panel: `https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin`
2. Click "QR Codes" in sidebar
3. Click "Download QR" for each table
4. Save the PNG files

Step 2: Print QR Codes

1. Print each QR code (recommended size: A5 or 5x7 inches)
2. Laminate for durability
3. Add instructions:

 Scan to Order

1. Scan this QR code
2. Enter your name
3. Browse menu & order
4. Enjoy!

Step 3: Place at Tables

- Table tents
- Table stands
- Laminated sheets
- Stickers

Step 4: Customer Experience

```
Customer at Table 5
    ↓
Scans QR Code
    ↓
Opens: https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-
projects.vercel.app/signup?tableId=table5
    ↓
Enters Name & Phone
    ↓
Menu Loads
    ↓
Browses & Orders
    ↓
Order Appears in Kitchen (Admin Panel)
    ↓
Tracks Status
    ↓
Requests Bill
    ↓
Done! ✅
```

Testing Checklist

Test 1: Admin Access

- ☐ Open admin URL on your Mac
- ☐ Login successfully
- ☐ Navigate to Kitchen page
- ☐ Navigate to Live Bills
- ☐ Navigate to Menu Management
- ☐ Navigate to QR Codes

Test 2: Admin from Another Device

- ☐ Open admin URL on another computer/tablet
- ☐ Login successfully
- ☐ Verify all features work
- ☐ Check real-time updates

Test 3: Customer Flow

- ☐ Generate a QR code for Table 1

- ☐ Scan QR code with your phone
- ☐ Complete signup (enter name & phone)
- ☐ Verify menu loads
- ☐ Add items to cart
- ☐ Place order
- ☐ Check order appears in Kitchen (admin panel)
- ☐ Verify real-time status updates

Test 4: Multi-Device Sync

- ☐ Open admin panel on 2 devices
- ☐ Place order from phone (as customer)
- ☐ Verify order appears on both admin devices
- ☐ Update order status on one device
- ☐ Verify update appears on other device

Immediate Next Steps

1. Test Admin Access (5 minutes)

```
# Open this URL in your browser:
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin

# Login with your admin credentials
# Explore all features
```

2. Generate QR Codes (10 minutes)

1. Login to admin panel
2. Go to "QR Codes" page
3. Download QR codes for all tables
4. Save them to a folder

3. Test Customer Flow (5 minutes)

1. Open one QR code on your computer screen
2. Scan it with your phone
3. Complete the signup
4. Browse menu and place a test order
5. Check it appears in Kitchen page

4. Print & Deploy QR Codes (30 minutes)

1. Print all QR codes
2. Laminate them (recommended)
3. Create table stands or tents
4. Place at each table

5. Train Staff (15 minutes)

1. Show them the admin panel

2. Demonstrate Kitchen page
3. Show Live Bills management
4. Explain order status updates

6. Launch! 🚀

- Open for customers
- Monitor first few orders
- Gather feedback
- Iterate and improve

Important Links

Vercel Dashboard:

```
https://vercel.com/pranavsunil-3491s-projects/qr-restaurant-ordering
```

What you can do:

- View deployment logs
- Monitor bandwidth usage
- See build history
- Update environment variables
- Rollback deployments

Firebase Console:

```
https://console.firebase.google.com/project/qr-ordering-system-c80d4
```

What you can do:

- View database
- Monitor reads/writes
- Check storage usage
- Update security rules
- Export data

GitHub Repository:

```
https://github.com/pranav9sunil/New-QR_Menu
```

What you can do:

- View code
- See commit history
- Manage branches
- Review changes

Pro Tips

Bookmark the Admin URL

Save this in your browser:

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin
```

Add to Home Screen (Mobile/Tablet)

For quick access, add the admin panel to your device's home screen. It will work like a native app!

Provide WiFi

For best customer experience, provide free restaurant WiFi. This ensures:

- Faster menu loading
- Better real-time updates
- No customer data usage
- More reliable connection

Monitor First Orders

Watch the Kitchen page closely for the first few orders to ensure everything works smoothly.

Gather Feedback

Ask customers about their experience:

- Was it easy to scan?
- Was the menu clear?
- Any issues?
- Suggestions?

Troubleshooting

Issue: Can't access admin from another device

Solution:

- Make sure you're using the full Vercel URL (not localhost)
- Check internet connection
- Try different browser

Issue: QR code doesn't work

Solution:

- Regenerate QR codes from production admin panel
- Ensure QR code points to Vercel URL (not localhost)
- Test with online QR code reader

Issue: Menu doesn't load for customers

Solution:

- Check Firebase console for errors
- Verify menu items exist in Firestore
- Check browser console (F12) for errors

Issue: Orders not appearing in Kitchen

Solution:

- Check internet connection
- Refresh the Kitchen page
- Verify Firebase security rules allow reads

Usage & Costs

Current Setup:

- **Vercel:** Free tier (100GB bandwidth/month)
- **Firebase:** Free tier (50K reads/day, 20K writes/day)
- **Total Cost:** \$0/month

Estimated Usage (50 customers/day):

- **Firestore Reads:** ~5,000/day ✓
- **Firestore Writes:** ~500/day ✓
- **Bandwidth:** ~5GB/month ✓

All well within free tier limits!

Continuous Deployment

Automatic Deployments:

Every time you push to GitHub, Vercel automatically builds and deploys!

```
# Make changes to your code
git add .
git commit -m "Update menu items"
git push origin main

# Vercel automatically deploys! 🚀
# You'll get an email when it's done
```

Manual Deployment:

```
vercel --prod
```

Success!

Your restaurant ordering system is now:

✓ **Live** - Accessible worldwide ✓ **Secure** - HTTPS encryption ✓ **Fast** - Global CDN ✓ **Scalable** - Auto-scaling ✓ **Free** - \$0/month ✓ **Real-time** - Instant updates ✓ **Multi-device** - Works everywhere

Customers can now:

✅ Scan QR codes at tables ✅ Browse your menu ✅ Place orders ✅ Track order status ✅ Request bills

You can now:

✅ Manage orders from Kitchen page ✅ Track live bills ✅ View analytics ✅ Update menu ✅ Generate QR codes ✅ Access from any device

Changing Your Vercel URL

Yes! You have several options to change or customize your URL.

Option 1: Add a Custom Domain (Recommended for Production)

Best for: Professional appearance, branding

Examples:

- `order.yourrestaurant.com`
- `menu.yourrestaurant.com`
- `yourrestaurant.com`

Step 1: Purchase a Domain

Buy a domain from any registrar:

- Namecheap: <https://www.namecheap.com>
- GoDaddy: <https://www.godaddy.com>
- Google Domains: <https://domains.google>
- Cloudflare: <https://www.cloudflare.com>

Cost: ~\$10-15/year

Step 2: Add Domain to Vercel

Via Vercel Dashboard:

1. Go to: <https://vercel.com/pranavsunil-3491s-projects/qv-restaurant-ordering>
2. Click **"Settings"** tab
3. Click **"Domains"** in sidebar
4. Click **"Add"** button
5. Enter your domain: `order.yourrestaurant.com`
6. Click **"Add"**

Via Vercel CLI:

```
cd "/Users/pranav/User Files/ASU/Internship/QR Code again"
vercel domains add order.yourrestaurant.com
```

Step 3: Configure DNS Records

Vercel will show you DNS records to add. Go to your domain registrar and add:

For Subdomain (e.g., `order.yourrestaurant.com`):

```
Type: CNAME
Name: order
```

```
Value: cname.vercel-dns.com
TTL: Auto or 3600
```

For Root Domain (e.g., yourrestaurant.com):

```
Type: A
Name: @ (or leave blank)
Value: 76.76.21.21
TTL: Auto or 3600

Type: CNAME
Name: www
Value: cname.vercel-dns.com
TTL: Auto or 3600
```

Step 4: Wait for DNS Propagation

- Usually takes 5-30 minutes
- Can take up to 48 hours
- Vercel will automatically enable HTTPS

Step 5: Verify Domain

1. Go back to Vercel Dashboard → Domains
2. You should see  next to your domain
3. Click **"Visit"** to test

Step 6: Regenerate QR Codes

IMPORTANT: After adding custom domain:

1. Login to admin panel at your NEW domain: `https://order.yourrestaurant.com/admin`
2. Go to "QR Codes" page
3. Download NEW QR codes (they'll now use your custom domain)
4. Replace old QR codes at tables

Your new URLs:

- Admin: `https://order.yourrestaurant.com/admin`
- Customer: `https://order.yourrestaurant.com/signup?tableId=table1`

Option 2: Change Vercel Subdomain (Free)

Best for: Better-looking free URL

Current URL:

```
qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app
```

Can change to:

```
your-restaurant-name.vercel.app
```

Via Vercel Dashboard:

1. Go to Project Settings:

- Visit: <https://vercel.com/pranavsunil-3491s-projects/gr-restaurant-ordering>
- Click **"Settings"** tab

2. Change Project Name:

- Click **"General"** in sidebar
- Find **"Project Name"** section
- Click **"Edit"**
- Enter new name: `your-restaurant-name`
- Click **"Save"**

3. Your new URL:

```
https://your-restaurant-name.vercel.app
```

Via Vercel CLI:

```
cd "/Users/pranav/User Files/ASU/Internship/QR Code again"

# Rename project
vercel project rename your-restaurant-name

# Redeploy
vercel --prod
```

After Changing:

1. **Update bookmarks** with new URL
2. **Regenerate QR codes** from admin panel
3. **Replace QR codes** at tables
4. **Notify staff** of new URL

Option 3: Add Multiple Domains

You can have BOTH custom domain AND Vercel subdomain:

Example:

- `https://order.yourrestaurant.com` (custom - primary)
- `https://your-restaurant.vercel.app` (Vercel subdomain - backup)

Both will work and point to the same app!

How to Set Up:

1. Add custom domain (Option 1)
2. Change Vercel subdomain (Option 2)
3. Both URLs will work

Set Primary Domain:

In Vercel Dashboard → Settings → Domains:

- Click the  menu next to your custom domain
- Click **"Set as Primary"**

- This becomes the default URL

Comparison: Custom Domain vs Vercel Subdomain

Feature	Custom Domain	Vercel Subdomain
Cost	~\$10-15/year	Free
Professional	✅ Very	⚠️ Somewhat
Branding	✅ Your brand	❌ Shows "vercel.app"
Easy to Remember	✅ Yes	⚠️ Can be long
Setup Time	5-30 minutes	Instant
HTTPS	✅ Auto	✅ Auto
Best For	Production	Testing/Development

Recommended Approach

For Testing (Now):

Use the current Vercel URL:

```
qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app
```

For Production (Later):

1. **Purchase domain:** yourrestaurant.com
2. **Add subdomain:** order.yourrestaurant.com
3. **Configure DNS** (5 minutes)
4. **Wait for propagation** (5-30 minutes)
5. **Regenerate QR codes** with new domain
6. **Launch!** 🚀

Step-by-Step: Complete Domain Setup

Day 1: Purchase Domain

1. Go to Namecheap/GoDaddy
2. Search for your restaurant name
3. Purchase domain (~\$12/year)
4. Complete registration

Day 1: Add to Vercel (5 minutes)

1. Vercel Dashboard → Settings → Domains
2. Add order.yourrestaurant.com
3. Copy DNS records shown

Day 1: Configure DNS (5 minutes)

1. Login to domain registrar
2. Find DNS settings
3. Add CNAME record:

- Name: `order`
- Value: `cname.vercel-dns.com`

4. Save

Day 1: Wait (5-30 minutes)

- DNS propagates
- Vercel verifies domain
- HTTPS certificate issued

Day 1: Test (2 minutes)

1. Visit `https://order.yourrestaurant.com`
2. Should show your app ✓
3. Visit `https://order.yourrestaurant.com/admin`
4. Login works ✓

Day 1: Update QR Codes (10 minutes)

1. Login to admin at new domain
2. Download all QR codes
3. Print new codes
4. Replace at tables

Day 1: Launch! 🚀

- New professional URL
- Same app, better branding
- Ready for customers!

Troubleshooting Domain Setup

Issue: Domain not working after 30 minutes

Check DNS:

```
# Check if DNS is propagated
nslookup order.yourrestaurant.com

# Should show Vercel's IP or CNAME
```

Solutions:

1. Verify DNS records are correct
2. Wait longer (up to 48 hours)
3. Clear browser cache
4. Try incognito mode
5. Check Vercel Dashboard for errors

Issue: "Invalid Configuration" in Vercel

Solutions:

1. Ensure CNAME points to `cname.vercel-dns.com`
2. Remove any conflicting A records
3. Wait for DNS propagation
4. Contact Vercel support

Issue: HTTPS not working

Solutions:

1. Wait 5-10 minutes for certificate
2. Vercel auto-issues Let's Encrypt certificate
3. Check Vercel Dashboard → Domains for status
4. Force refresh: Ctrl+Shift+R (Windows) or Cmd+Shift+R (Mac)

Quick Commands Reference

Change Project Name:

```
vercel project rename your-new-name
```

Add Custom Domain:

```
vercel domains add order.yourrestaurant.com
```

List All Domains:

```
vercel domains ls
```

Remove Domain:

```
vercel domains rm old-domain.com
```

Check Domain Status:

```
vercel domains inspect order.yourrestaurant.com
```

Cost Breakdown

Free Option (Vercel Subdomain):

- Vercel hosting: **\$0/month**
- Firebase: **\$0/month**
- Total: **\$0/month**

Custom Domain Option:

- Domain registration: **~\$12/year** (~\$1/month)
- Vercel hosting: **\$0/month**
- Firebase: **\$0/month**
- Total: **~\$1/month**

Recommendation: Start with free Vercel subdomain for testing, then add custom domain for production launch.

Example Domain Names

Good domain names for restaurants:

Subdomain Approach (Recommended):

- `order.yourrestaurant.com`
- `menu.yourrestaurant.com`
- `dine.yourrestaurant.com`

Root Domain:

- `yourrestaurant.com`
- `yourrestaurantname.com`

Creative:

- `eat.yourrestaurant.com`
- `table.yourrestaurant.com`
- `reserve.yourrestaurant.com`

Support

Documentation:

- Complete Guide: Check `.gemini` folder
- Quick Start: `DEPLOY_NOW.md`
- Deployment Script: `deploy.sh`

Resources:

- Vercel Docs: <https://vercel.com/docs>
- Firebase Docs: <https://firebase.google.com/docs>
- Your Dashboard: <https://vercel.com/dashboard>

You're Live!

Your QR code restaurant ordering system is now deployed and ready for customers!

Next: Test it thoroughly, print QR codes, train staff, and launch! 🚀

Production URL (Bookmark this!):

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app
```

Admin Panel (Bookmark this!):

```
https://qr-restaurant-ordering-8qsnbqlee-pranavsunil-3491s-projects.vercel.app/admin
```

Congratulations on your successful deployment! 🎉
