

QR Restaurant Ordering System - Testing Checklist

Pre-Deployment Checklist

✅ Firebase Configuration

- ☐ Firebase project created
- ☐ Firestore database initialized
- ☐ Firebase Authentication enabled
- ☐ Security rules updated for production
- ☐ Environment variables configured in Vercel

✅ Vercel Deployment

- ☐ Project deployed to Vercel
 - ☐ Production URL accessible
 - ☐ Deployment Protection disabled (no login required)
 - ☐ Environment variables set correctly
 - ☐ Build completes without errors
-

Admin Panel Testing

1. Login & Authentication

- ☐ Admin can login with correct credentials
- ☐ Invalid credentials show error message
- ☐ Session persists after page refresh
- ☐ Logout works correctly

2. Table Layout Management

- ☐ Can add new tables
- ☐ Can edit table names
- ☐ Can change table capacity
- ☐ Can move tables (drag & drop)
- ☐ Can delete tables
- ☐ Table positions save correctly
- ☐ QR codes generate for each table

3. Menu Management

- ☐ Can add new menu items
- ☐ Can edit existing items
- ☐ Can delete menu items
- ☐ Can set prices (€ symbol displays)
- ☐ Can upload/set image URLs
- ☐ Can set dietary tags (vegan, vegetarian, gluten-free)
- ☐ Can set spice levels (0-3)

- ☐ Can mark as Chef's Special
- ☐ Can mark as Bestseller
- ☐ **Customization Options:**
 - ☐ Can add customization groups
 - ☐ Can set group name (e.g., "Size", "Toppings")
 - ☐ Can choose single/multiple selection
 - ☐ Can add options with prices
 - ☐ Can remove options
 - ☐ Can remove entire groups
 - ☐ Dialog scrolls when many options added
 - ☐ Customizations save correctly

4. QR Code Generation

- ☐ QR codes page loads
- ☐ Can download QR codes for all tables
- ☐ QR codes contain correct URL format
- ☐ QR codes are scannable
- ☐ Each QR code links to correct table

5. Kitchen Management

- ☐ New orders appear in real-time
- ☐ Can mark orders as "Preparing"
- ☐ Can mark orders as "Ready"
- ☐ Can mark orders as "Completed"
- ☐ Order status updates in real-time
- ☐ Can view order details
- ☐ Can see customizations for each item
- ☐ Can see special notes
- ☐ Orders grouped by table

6. Live Bills Management

- ☐ Can view all active sessions
- ☐ Can see orders for each table
- ☐ Can edit order quantities (+/-)
- ☐ Can apply discounts (percentage/fixed)
- ☐ Can create manual orders
- ☐ Can select table for manual order
- ☐ Can print bills
- ☐ Bill shows correct totals
- ☐ Bill shows tax calculation
- ☐ Bill shows discount if applied
- ☐ Can close sessions

7. Past Bills & Accounts

- ☐ Can view past bills
- ☐ Can filter by date range
- ☐ Can search by table/session
- ☐ Revenue totals calculate correctly
- ☐ Can export data
- ☐ Currency displays as €

8. Settings

- ☐ Can update restaurant name
 - ☐ Can update tax rate
 - ☐ Can update logo
 - ☐ Settings save correctly
 - ☐ Settings persist after logout
-

Customer Experience Testing

1. QR Code Scanning

- ☐ QR code scans successfully on iPhone
- ☐ QR code scans successfully on Android
- ☐ Opens correct signup page
- ☐ Table ID passed correctly in URL
- ☐ No Vercel login required

2. Customer Signup

- ☐ Signup page loads correctly
- ☐ Can enter name
- ☐ Can enter phone number
- ☐ Form validation works
- ☐ Can submit signup
- ☐ Redirects to menu after signup
- ☐ Session created in database

3. Menu Browsing

- ☐ Menu loads all items
- ☐ Images display correctly
- ☐ Prices show in €
- ☐ Categories display correctly
- ☐ Can search menu items
- ☐ Can filter by dietary preferences
- ☐ Can filter by Chef's Special
- ☐ Can filter by Bestseller
- ☐ Spice level indicators show
- ☐ Dietary badges display (vegan, vegetarian, gluten-free)

4. Item Customization

- ☐ "Customisable" text shows for items with options
- ☐ Clicking item opens customization modal
- ☐ Customization groups display correctly
- ☐ Radio buttons for single selection
- ☐ Checkboxes for multiple selection
- ☐ Prices update when selecting options
- ☐ Can add special notes
- ☐ Can add to cart with customizations

5. Cart Management

- ☐ Can add items to cart
- ☐ Cart icon shows item count
- ☐ Can view cart
- ☐ Can increase/decrease quantities
- ☐ Can remove items
- ☐ Subtotal calculates correctly
- ☐ Customizations display in cart
- ☐ Special notes display in cart

6. Order Placement

- ☐ Can place order from cart
- ☐ Order confirmation shows
- ☐ Cart clears after order
- ☐ Order appears in Kitchen immediately
- ☐ Can place multiple orders

7. Order Tracking

- ☐ Can view "My Orders"
- ☐ Order status updates in real-time
- ☐ Shows "Pending" → "Preparing" → "Ready"
- ☐ Can see order details
- ☐ Can see customizations
- ☐ Past orders display correctly

8. Bill Request

- ☐ "Ready to Pay" button visible
 - ☐ Can request bill
 - ☐ Bill shows all orders
 - ☐ Bill shows correct totals
 - ☐ Bill shows tax
 - ☐ Bill shows discounts (if applied)
 - ☐ Can view bill as PDF
-

Cross-Device Testing

Desktop

- ☐ Chrome browser
- ☐ Firefox browser
- ☐ Safari browser
- ☐ Edge browser

Mobile

- ☐ iPhone (Safari)
- ☐ iPhone (Chrome)
- ☐ Android (Chrome)
- ☐ Android (Firefox)

Tablet

- ☐ iPad
 - ☐ Android tablet
-

Performance Testing

- ☐ Pages load within 3 seconds
 - ☐ Real-time updates work smoothly
 - ☐ No lag when adding items to cart
 - ☐ Images load quickly
 - ☐ QR codes generate quickly
 - ☐ No console errors in browser
-

Security Testing

- ☐ Admin routes require authentication
 - ☐ Cannot access admin without login
 - ☐ Customer cannot access admin panel
 - ☐ Firebase security rules prevent unauthorized access
 - ☐ No sensitive data in URLs
 - ☐ No credentials visible in login page
-

Data Integrity Testing

- ☐ Orders save correctly to Firestore
- ☐ Sessions track correctly
- ☐ Customer data saves properly
- ☐ Menu items update in real-time
- ☐ Table status updates correctly
- ☐ No data loss on page refresh

Edge Cases

- ☐ Empty cart behavior
 - ☐ No menu items available
 - ☐ No tables configured
 - ☐ Invalid QR code URL
 - ☐ Network disconnection handling
 - ☐ Multiple customers at same table
 - ☐ Concurrent orders from same table
 - ☐ Very long item names
 - ☐ Very long customization names
 - ☐ Many customization options (20+)
 - ☐ Large order quantities (99+)
-

Final Production Checklist

- ☐ All features tested and working
 - ☐ No console errors
 - ☐ No broken images
 - ☐ All links working
 - ☐ Currency displays correctly (€)
 - ☐ Tax calculations correct
 - ☐ QR codes printed and laminated
 - ☐ QR codes placed at tables
 - ☐ Staff trained on admin panel
 - ☐ Admin credentials secured
 - ☐ Firebase security rules updated
 - ☐ Vercel deployment protection disabled
 - ☐ Custom domain configured (optional)
 - ☐ Backup plan in place
-

Post-Launch Monitoring

Week 1

- ☐ Monitor order flow
- ☐ Check for errors in logs
- ☐ Verify real-time updates
- ☐ Collect staff feedback
- ☐ Collect customer feedback

Week 2-4

- ☐ Review analytics
- ☐ Optimize slow queries

- ☐ Fix any reported bugs
 - ☐ Add requested features
-

Notes

Use this checklist before launch and periodically after deployment to ensure everything is working correctly.

Status Key:

-  = Tested and working
-  = Failed / Needs fixing
-  = Partially working / Needs attention
-  = Skipped / Not applicable
